Professional Graphic Design Services made very affordable!

At **Out of the Box** our clients enjoy the benefit of over 30 years of professional experience in all aspects of graphic design and print media development. We pride ourselves in being known as "Image Experts" providing professional image services at far below average industry prices.

We have developed practical tried and true methods of helping our clients design and implement highly professional branding for their company's product and services. From logo development to any form of print media design and beyond, we offer solutions that will represent you professionally and serve you to effectively market your products and services so that you can focus on the actual building of your business!

This brochure features some of our most popular design packages with the pricing and services included in each package. We have a package suited to any budget and all of our services come with a 100% customer satisfaction guarantee.

DESIGN PACKAGES FEATURE:

- Strategic Logo Design Services
- Professional Print Media Design
- Affordable Resourcing Solutions
- Powerful Marketing & Sales Tools

We can help your company grow through simple logo design services all the way through to providing you with the opportunity to implement one of the most powerful professional marketing tools available in the industry today ... "An Out of the Box Experience!"

Let **Out of the Box** help you decide on the design package or service solutions that are the perfect fit for your needs. Call us at **303.883.9385** and let's get started today.

STRATEGIC LOGO DESIGN

Our simple strategic method incorporates a step-by-step design process that is certain to create the PERFECT company logo or product branding you're looking for. The process begins with a brief design consultation & interview where you speak directly with your assigned designer to complete a simple questionnaire that will aid us in the development of your first set of design drafts (proofs).

Each design package we offer begins with a specific number of logo/design drafts, and then step-by-step we proceed by developing a second, third, or fourth tier of design proofs. Think of it as an inverted pyramid of design samples. (*see illustration on next page) Starting with a higher number of sample designs and through a process of elemental evaluation and elimination we ultimately arrive at the final design. Each tier of development is decreased by one number of total samples to be developed for the next set of samples until we arrive at the final design.

We then take that final design and incorporate it into "print ready" high resolution, properly specified & formatted image files, professionally suitable for all of the applications requested during the original consultation.

Our strategic design packages vary in price to include **10, 15 or 21** total logo/branding designs to choose from. Each package also includes a different level of additional "value added" design services which we provide and/or offer after the final logo/branding image has been completed. At minimum, these include one or more professional "print ready" design pieces that we also develop, such as, business cards or brochure designs. The specifics depend on the package you selected. This service is included in your package at no additional cost.
